

As a professional truck driver, it is extremely important for me to know immediate weather and traffic conditions for the area in which I am driving. This can be imparative as we all know both of these things change from minute to minute. I am VERY opposed to the HR 4026 Bill. Please do not allow this bill to pass as it will take away our much needed information that presently is available to each one of us out here on the road as well as those that use the weather and traffic stations locally. Thank you for not passing Bill HR 4026.  
Most Cordially,  
Corina Neff
